I Zaffar Ahamer Peer, S/O Mohd. Yousef Peer, R/O khanawari fatehkadal Srinagar India DOB: 13-03-1955.

I was born in a poor family but we could afford medium life standards.

I had to stop my education in teenage and had to start working to fulfil our needs. It was going to support my father as well. My father had introduced me to a person named Mohd. Ameen kalu who had a business partner named maheediin hagro, they used to deal with electronics and items.

I started to work at the same place and learned to repair radio and transistor. During those days it was a beneficial business but during my learning phase I did not get any salary. After one year they started to pay me 30 RS a month (INR) and with that amount we used to buy our monthly groceries (RICE).

After some time I joined a different company and it went so on with the increments in my salary. I than started my own business with a partner who was my friend as well. I could not invest any amount for my own business and that is why my friend invested 2500 INR and we started a business in partnership.

After two and a half year's I had to break that partnership as he was not as honest as I expected him to be. I than started my own business and my brother who is two and a half years elder than to me also joined the business, since we were living together with our parents.

The shop was located in the area called chattabal, and our financial condition started to improve which included in our life style as well. After year by year we made a good reputation and a good influence in the market.

We then located to our new house and we continued to grow financially. Than me and my brother got married and started a new life.

After one year I became father of a baby girl and changed my business where I had no knowledge about the business. I went to ladakh after some time where I purchased some handicrafts and antiques.

After some time I moved to the southern part of India that is Kovalam (Kerala) where I started with a small shop and sold my handicrafts and antiques.

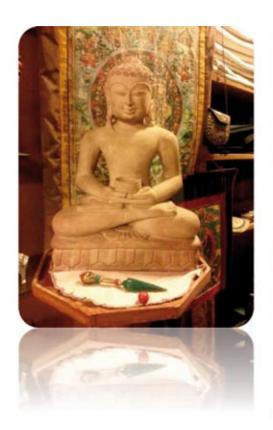

With time I started to grow and succeed at that time. I than brought my brother and his family as well to Kovalam as my business grew day by day.

My actual aim was to highlight my father's reputation which I achieved somehow. My father expired in 1984 and my mother expired on 29th Jan 2016. She was living with me and I always did my best to keep her happy. After few years my own nearest relatives tried to dig me down but my destiny always stood with me.

I have a son and a daughter and my daughter has been married 4 years ago and my son is a software engineer currently working in techno park Trivandrum. I always had faith in my God and I always wish that everyone should stay happy and enjoy their life. In my whole life I have learnt that money and materials does not matter in life, the only thing which matters is your own God and family.

With that I wish all of you a happy and enjoyable life.
